

Product Lifecycle Project Timeline

Created by: Kimberly Wiefing

LEGEND

- = Risk Area or Off Track
- = In Process
- = DONE

PURPOSE: This diagram provides an "at-a-glance" view of the means by which the team will accomplish the goals of the PLC Project and high level status and progress against this plan.

BLOCKS: Blocks show rough sequence of major tasks only. Width of blocks coarsely correlates with relative length of tasks.

DEPENDENCIES: While many of these tasks can proceed in parallel, critical dependencies are shown with arrows.

TIMELINE: The timeline is coarse and tentative, depending heavily on the amount of resources allocated to this project and the availability of key stakeholders and sponsors to participate in this process.

CRITICAL PATH: The most likely critical path is shown in red outlined boxes.

As of 3/22/01: March 27

April 17 April 30 May 19 June 8 ? July 13 ? Aug 31 ?
